

In the claims:

Please amend the claims as follows:

Claims 1 to 13. (Canceled)

14. (New) A demountable post extension or extender (10), for extending the span of an elongate support post such as upon a platform deck container, with a clamp action mounting at a base end operable by a mechanically advantaged wedge drive using a transverse movable wedge (21), for longitudinal movement of a depending mounting jaw (22), to create an axial clamp action and a unitary overall past structure.

15. (New) A post extension (10) of claim 14, with a rotatable depending mounting jaw (22) locatable in a profiled mounting plate (13) aperture.

16. (New) A post extension (10) of claim 15, with an elongate tubular body, a carrier or traveler (38) movable longitudinally of the body, with a depending jaw (22) configured as a locating and locking tongue, protruding from a base plate, a transverse positional adjustment screw (10), for engagement with a wedge (21) located in a longitudinal slot in a carrier (38), so that screw (19) rotation draws the wedge (21) along the screw (19) and moves

the carrier (38) and in turn tongue (22) longitudinally of the post (10).

17. (New) A post extension (10) of claim 16, with a depending flange (32) and/or profiled lip (31) to inhibit rotation upon screw (19) tightening.

18. (New) A post extension (10) of claim 17, with an inner abutment (37) depending from mounting plate (24) to locate in a tongue reception aperture (39) in a capture, handling and support fitting (13).

19. (New) A post extension (10) of claim 14, configured for cooperative mounting upon the other post extensions (10) or direct upon a container platform base.

20. (New) A post extension (10) of claim 14, with a restraint tie (27), such as a clamp screw retention element, to inhibit inadvertent release and demounting.

21. (New) A support post for mounting upon a platform deck container such as a collapsible flat rack including a post extension of claim 14.

22. (New) A platform deck container (20), such as a collapsible flat rack, fitted with a post of claim 21 and/or a post extension of claim 14.

23. (New) A container (20) of claim 22 with one or more bespoke profile recesses (34) in a platform deck (12) to accommodate demounted post extensions (10) of claim 14.
